Load Input features loop
Load Weights loop
Write output features loop
BufI (R)
192x15x15, split over 12 banks
BufW (R)
8x192x3x3, split over 96 banks
BufO (R,W)
8x13x13, split over 8 banks
96 (TM*TN=8*12) parallel MACs
Compute 12 products per row
Compute 8 row sums
Addition of the 12 products per row + old BufO value
